MOVING FORWARD TOGETHER WITH EU EXPERTISE

Aim of the Workshop:

The overarching objective of the workshop is to support and further promote the exchanges between Beneficiaries and urban areas through sharing of experience and good practices on especially adaptation efforts in Sustainable Energy and Climate Action Plan (SECAP). The focus will be on the climate risks of heat and pluvial flood, especially on local vulnerability, impact and risk assessments, cost/benefits of adaptation solutions, local adaptation planning and implementation of adaptation solutions.

The regional event will support the development of SECAPs and focus on the issue of adaptation and resilience in the urban, peri-urban and rural context in terms of promoting climate change adaptation actions at municipal and city level and fostering cooperation with the Covenant of Mayors initiative.

The workshop aims at strengthening beneficiary's efforts toward regional and local adaptation planning and seize linkages to disaster risk reduction and local to regional development. It also aims at facilitating inter-regional and transnational exchange on urban adaptation and resilience activities, providing guidance, highlighting emerging best practices, and showcasing examples and case studies. Knowledge, experiences and approaches will be presented that support policymakers, governmental and administrative officials as well as experts at the relevant sub-national level of cities and municipalities.
