MOVING FORWARD TOGETHER WITH EU EXPERTISE

## Aim of the Workshop:

---

The aim of this workshop is to support representatives of the Serbian Ministry of Environmental Protection in their implementation of emissions trading by helping to increase understanding of all ETS stakeholders of the requirements defined in the rulebook on ETS monitoring and reporting.

The training specifically aims at the following objectives:

- To increase awareness on ETS among all stakeholders, with a specific focus on upcoming Serbian ETS legislation.
- To illustrate lessons learned on ETS implementation in the EU and elsewhere in the world.
- To support the implementation of the rulebook on ETS monitoring and reporting, and to prepare all stakeholders on the future requirements resulting from this rulebook and from the primary ETS legislation.
- Help stakeholders to understand their needs for effective implementation of the rulebook on monitoring and reporting, including aspects of capacity building, resource planning and risks at stake.
- To obtain better insight and understanding of monitoring and reporting rules and to understanding of the guidance material available at EU level to support a proper implementation and (for operators) successful compliance with ETS requirements
- To accelerate harmonization with the EU acquis in the field of EU ETS to fulfil the requirements of Serbia's EU Accession process.
